Oversize Common Carrier Delivery

All orders with any quantity of shades or blinds or any continuous valance 90" or more in width/height are considered oversize. Therefore, a net shipping charge per oversized unit will be assessed.

Oversized orders that require expedited shipping will be quoted and charged accordingly.

Please see General Information for additional freight and shipping charge information.

Defining Opacity <i>(Light blockage varies by color, fabric style and mounting type. Side light gaps are inherent in roller shade products.)</i>		
Opacity Classification	Light Control/Privacy	View Through Fabric
Sheer	Most Light/Least Privacy Diffuses light	Objects are visible
Semi-Sheer	Moderate Light/Some Privacy Blocks some light	Objects less visible
Semi-Opaque	Some Light/Better Privacy Dims light	Objects appear as soft shadows
Opaque	Minimal Light/More privacy Blocks more light	Objects are not distinguishable
Blackout	Least Light/Maximum privacy Blocks most light except light gaps	Objects are not visible

OPTIONS & FEATURES

Panel Attachment

- Heavy-duty Velcro sewn to backside of material.
- Provides easy panel installation & removal to carrier glides.

Controls

- Cord draw
- Wand draw
- Free Floating (with wands)

Note: To conceal the track, Fabric Cornice or Deluxe Valance top treatment options are recommended.

Bottom Rail Options

Heat Sealed Aluminum (~1-1/4")

Standard Bottom Rail on all patterns except:

- Cordis
- Poplar Blackout
- Ripoli
- Uptown Room Darkening
- Hayworth
- Rhone
- Uptown

Omni Bottom Rail (~ 1-1/8")

Available in configurations below and in colors of white, vanilla, bronze, black and silver.

- Omni Curved Unwrapped
- Omni Flat Unwrapped
- Omni Curved Wrapped (only front face of rail is wrapped)

FABRIC CORNICE OPTION

- Available with Panel Track or as a stand alone cornice.
- Refer to Collection Information Section for available patterns.
- Minimum Width – 12"
- Maximum Shade Width - 168" (with splice)
- Maximum Continuous and Stand Alone Valance - 192" (with splice)
- Standard Cornice Height – 6"
- Optional Cornice Height – 4" & 8"
- Inside or outside Mount – 1-1/2" to 8" depth returns at 1/2" increments (i.e. 6", 6.5")
- For cornices wider than material width, material will be seamed or spliced. Railroadings is available upon request.

FABRIC CORNICE OPTION

Keystones

- Each cornice can order up to three keystones (refer to the surcharge page for price), available in both square and trapezoid (wide side up).
- All fabric cornices that exceed 144" will be spliced. Brackets with screws will be provided to connect the spliced cornice.
- Keystone will also be available for ordering with non-spliced cornices under 144".

- Splicing Location:
 - Spliced location will be at the center of the keystone(s)
 - Standard Position: Keystone(s) will be evenly positioned based on the cornice width.
 - Custom Position: Keystone(s) can be customized to the customer's desired location(s). All spliced sections must be equal to or greater than 12" and cannot exceed 144".

Example:

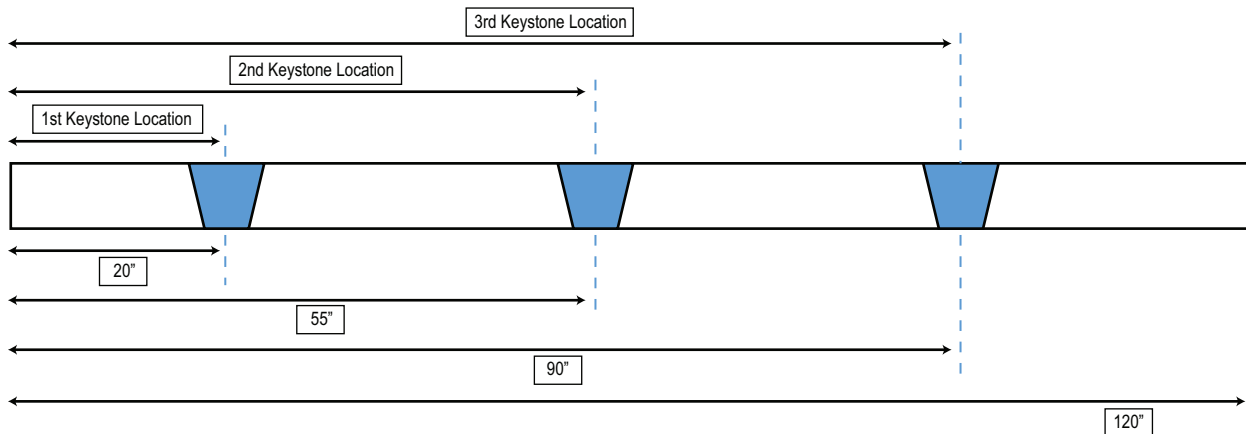

Cornice Total Width: 120"

1st Keystone (Splice) Location: 20"

2nd Keystone (Splice) Location: 55"

3rd Keystone (Splice) Location: 90"

- All spliced locations should measure from the left edge of the entire cornice to the center of the keystone(s).

There may be some visual puckering on the cornice when the width exceeds 96". These are normal characteristics and request for remakes and/or credits will not be considered. Therefore, we recommend splicing the cornice when wider than 96"

DELUXE VALANCE

- Available with Panel Track or as a stand alone cornice.
- Refer to Collection Information Section for available pattern.
- Has clear edge groovers to hold the coordinating fabric in place.
- Standard height 3-5/8"
- Direction of fabric insert follows shade installed below.
- If valance is wider than material width, and shade below is not railroaded; valance fabric insert will be made with a center seamed like image shown below.

- Default return length:
 - Inside Mount: No returns
 - Outside Mount: 6-5/8" (overall 7-3/8")
- Return Length Override:
 - Minimum return length 1-1/2" (overall 3")
 - Maximum return length 9-5/8" (overall 10-3/8")
 - Has to order in 1/2" increments

Note: When ordering returns, valance corner cap adds 3/4" to the valance return depth.

How To Order

Controls

- Must specify control type with order – cord, wand, free floating.
- Cord control length is 10" less than ordered length.
- Wand draw is available; Wood wand size: 36".
- Some configurations require dual wands. Lead panel on each side will come with a wand.

Panel Stack Configurations

- Specify panel configuration from choices below.
- Approximately 3" material overlap when panels in fully closed position.
- Each stacking side will have 1 fixed panel.
- Optional “**free floating**” panels available. (surcharge applies)
- Free floating panels available on one-way up to 5 panels only.

Split stack configurations available.

Each panel comes with wand.

Panels not interconnected with each other; each panel hand operated independently and can be positioned any place along the track.

Number of Panels	(Overall Width)	Stack Position / Configurations (<i>"Room View"</i> - Each stacked side will have 1 fixed panel)		
		Single Stack Left Stack	Single Stack Right Stack	Split Stack Note: Comes with Dual Wand (if ordered with wand control)

PRODUCT SPECIFICATIONS

Panel Track Profile

- White painted aluminum profile.
- See mounting depth requirements on page 21 for panel track sizes.

Panel Track Splice

- Automatically comes with any window opening over 144" wide – track ships from factory in (2) equal size pieces.
- Recommended (request when placing order) with window openings over 100" wide to reduce risk of freight damage and provide easier handling by installers.
- Splice plate easily & securely connects separate tracks together to operate as a single track unit.
- Installers prefer the convenience of handling smaller tracks on the job site, then connecting together at installation.

Panel Size / Stacking Width

- **12" Minimum Panel Width** (includes 3" for overlap).
- **12" Minimum Panel Height**.
- **46" Maximum Panel Width** (includes 3" for overlap).
- **144" Maximum Panel Height**.
- individual panel size varies depending on overall shade width & panel configuration.

NOTE: The smaller the panel width, the narrower the stacking space

To calculate stacking width; overall width + (number of overlaps x 3) then divide by number of panels

Example # 1 – 3 panel 112" W + 6 (2 overlaps x 3 = 6) = 118 divide by 3 panels = 39-3/8" stacking / panel width

Example # 2 – 4 panel 112" W + 9 (3 overlaps x 3 = 9) = 121 divide by 4 panels = 30-1/4" stacking / panel width

PANEL TRACK HOW TO MEASURE

**Note: Projection of window handles / cranks could interfere with panel track panels.
Refer to "mounting depth requirements" above for projection clearance**

Inside Mount (IB) Installation - Window

To find width: Measure the opening across the top where the headrail is to be installed from inside of jamb on left to inside of jamb on right. **Round the measurement down to the nearest 1/8". Refer to mounting depth requirements.**

To find height: Measure from the inside top of the opening on the left, at the center, and on the right to the sill; **round the measurement down to the nearest 1/8" and note the smallest dimension. Do not make any allowances: the factory will make all adjustments so the headrail will fit the opening properly and the panels will clear the sill by 1/2".**

Inside Mount

Outside Mount (OB) Installation - Patio Door / Room Divider

To find width: Measure the width of the area to be covered at the place where the headrail will be installed to the nearest 1/8". Blind should overlap opening at least 4" on each side.

To find height: Measure the height of the area to be covered and **round down to the nearest 1/8"**. Blind should extend **at least 3" above opening or window moulding.**

For ceiling-to-floor installations, deduct 1/2" for proper clearance.

Specifying OM measurement means the factory makes no allowances.

Outside Mount (OB) Installation - Window

To find width: Measure the width of the area to be covered at the place where the headrail will be installed to the nearest 1/8". Blind should overlap **opening at least 4"** on each side to ensure privacy. To calculate stack dimensions, refer to page 7.

To find height: Measure the height of the area to be covered and **round down to the nearest 1/8"**. Blind should extend **at least 3" above and 3" below opening or window moulding.**

Outside Mount

Special Measuring & Installation Considerations

Caution: Panel Tracks installed on windows near wall or baseboard heaters must clear the heaters by 12" above and 6" to the side.

Stretching of panel materials is probable with Textured materials:

IB Mount - we do not recommend IB mount due to probable stretching

OB Mount - extra adjustment recommended for placement of mounting brackets allowing panel clearance above the floor to anticipate panel material stretching:

- material can stretch up to 1" length
