Defining Opacity (*Light blockage varies by color, fabric style and mounting type. Side light gaps are inherent in roller shade products.*)			
Opacity Classification	**Light Control/Privacy**	**View Through Fabric**	**Best Use**
Semi Sheer	**Most Light/Least Privacy** Diffuses light	Objects are visible	A room that requires minimal light control and privacy like a kitchen or play room.
Light Filtering	**Moderate Light/Some Privacy** Blocks some light	Objects less visible	A room that requires moderate light control and privacy like a dining room or family room.
Room Darkening	**Least Light/Most privacy** Blocks most light	Objects are not visible	A room where light control and privacy is required, like a bedroom or media room.
Blackout	**Most Privacy with No Light Gap** Blocks most light	Objects are not visible	A room that requires maximum privacy and light control with no side light gaps.

Override request to change the color of the bottom rail & control wand must be noted at the time of order. Changing the color of the bottomrail end cap is not an available option.

Wand Color Options from Left to Right:
Pure White, White, Oak/Natural, Mahogany, Light Gray, Ebony

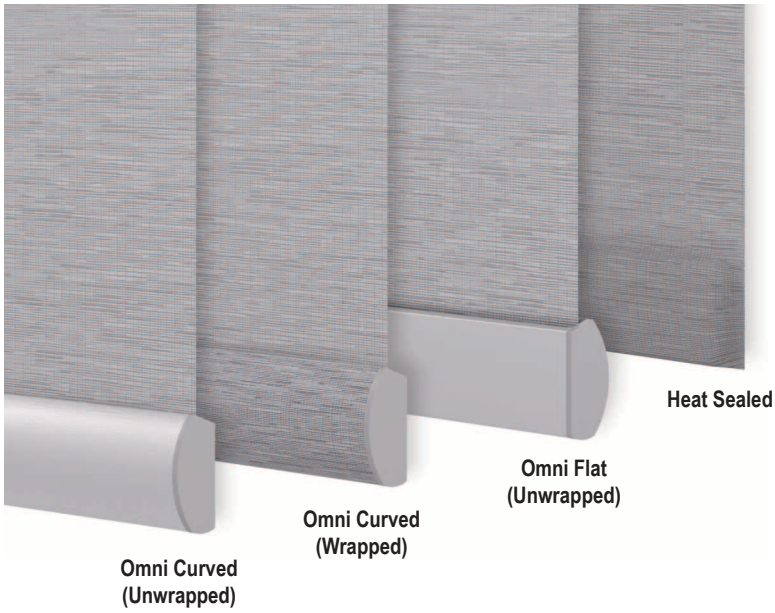
OPTIONS & FEATURES

Panel Attachment
- Heavy-duty Velcro sewn to backside of material.
- Provides easy panel installation & removal to carrier glides.

Controls
- Wand draw

Note: To conceal the track, Fabric Cornice top treatment options are recommended.

Bottom Rail Options



Heat Sealed Aluminum (~1-1/4")

Below fabrics are only available with Omni Bottom Rail

- 1% , 3%, 5% Clean Screen
- Sheerweave 7500/7500R
- Sheerweave 7700R

Omni Bottom Rail (~ 1-1/8")

Available in configurations below and in colors of white, vanilla, bronze, black and silver.

- Omni Curved Unwrapped
- Omni Flat Unwrapped
- Omni Curved Wrapped (only front face of rail is wrapped)

FABRIC CORNICE OPTION

- Refer to Collection Information Section for available patterns.
- Available with Panel Track or as a stand alone cornice.
  – Maximum width with panel track – 168" (with splice when wider than 144")
  – Maximum width for stand alone cornice – 192" (with splice when wider than 144")
- Minimum Width – 12"
- Standard Cornice Height – 6"
  – Optional Cornice Height – 4" & 8"
- Inside or outside Mount – 1-1/2" to 8" depth returns at 1/2" increments (i.e. 6", 6.5")
- To determine the maximum width for continuous Fabric Cornices without splice, subtract 4" from the maximum non-railroad width.
  – To avoid any visible splice seam, keystone(s) can be purchased to hide the seam(s)
- Dust cover only comes with outside mount cornice: 1-1/2", 4" & 6" return length

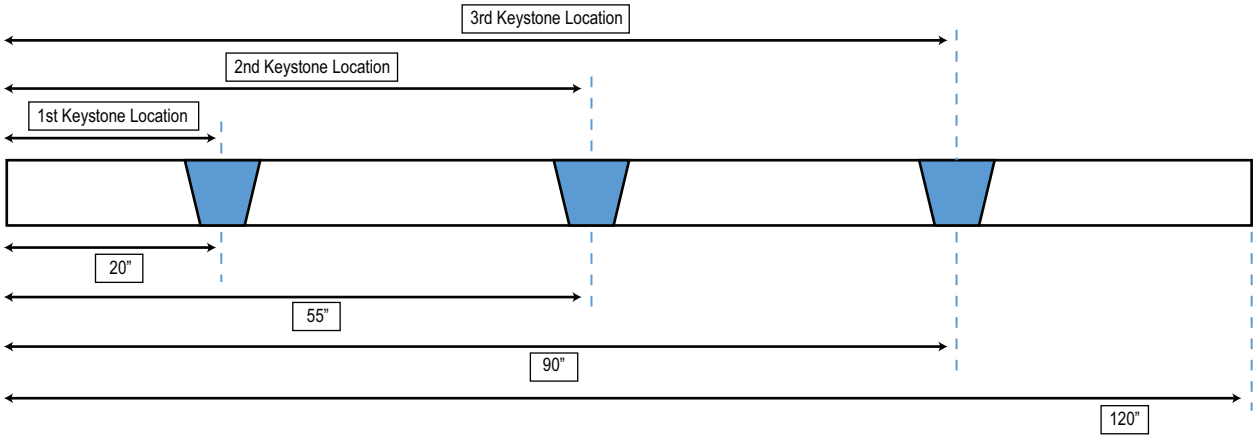
Keystones

- Up to three keystones can be ordered for each cornice (refer to the surcharge page for price)
- Keystone is available in square or trapezoid (wide side up) shape.
- Keystone is also available for ordering with non-spliced cornices under 144".
- All fabric cornices that exceed 144" will be spliced. Brackets with screws will be provided to connect the spliced cornice.

- Splicing Details:
  - Spliced location will be at the center of the keystone(s)
  - Standard Position: Keystones are evenly positioned on the cornice.
  - Custom Position: The location(s) for the keystone(s) can be customized. All spliced sections must be equal to or greater than 12” and cannot exceed 144”.

Example:
Cornice Total Width: 120”
1st Keystone (Splice) Location: 20”
2nd Keystone (Splice) Location: 55”
3rd Keystone (Splice) Location: 90”

- All spliced locations should measure from the left edge of the entire cornice to the center of the keystone(s).



There may be some visual puckering on the cornice when the cornice width exceeds 96". These are normal characteristics and request for remakes and/or credits will not be considered. We strongly recommend splicing the cornice when wider than 96".

FINISHED DIMENSIONS

For all options below,
Shade Height = Ordered Height - 1/2" (Inside Mount)
Shade Height = Ordered Height (Outside Mount & Net Mount)

Panel Track with NO TOP TREATMENT	**Inside Mount (IB)**	**Outside Mount (OB)**
Panel Track*	Ordered Width - 1/4"	Ordered Width
Overall Panel Width	Ordered Width - 1-3/8"(± 1/8")	Ordered Width - 7/8" (± 1/8")

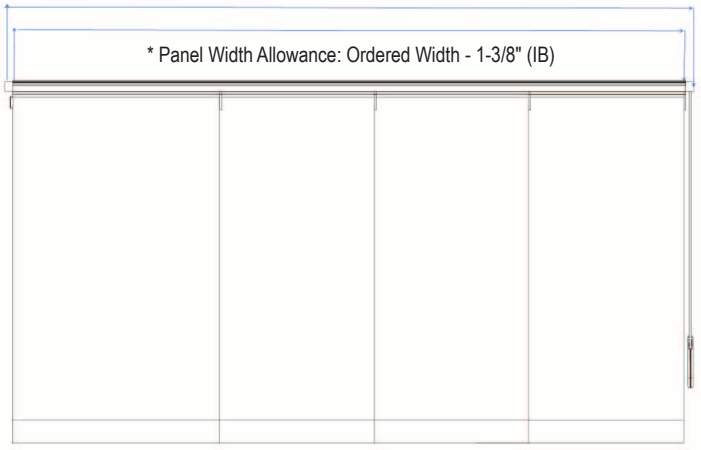
Panel Track with FABRIC CORNICE	**Inside Mount**	**Outside Mount**
Panel Track*	Ordered Width - 1/4"	Ordered Width
Overall Panel Width	Ordered Width - 1-3/8"(± 1/8")	Ordered Width - 7/8" (± 1/8")
Valance with no returns	Ordered width - 1/8"	Ordered Width + 1-1/2"
Valance with returns	Ordered Width + 1-1/2"	Ordered Width + 1-1/2"

* Panel width allowance: -1 3/8" (IB) and -7/8" (OB)

FABRIC CORNICE ONLY	**Inside Mount**	**Outside Mount**
Valance with no returns	Ordered width - 1/8"	Ordered Width + 1-1/2"
Valance with returns	Ordered Width + 1-1/2"	Ordered Width + 1-1/2"

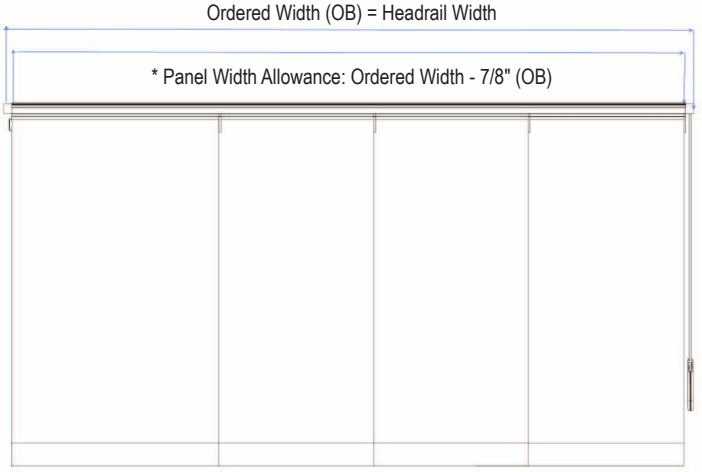
Ordered Width (IB)

Headrail Width: Ordered Width - 1/4"



Ordered Width (OB)

Ordered Width (OB) = Headrail Width



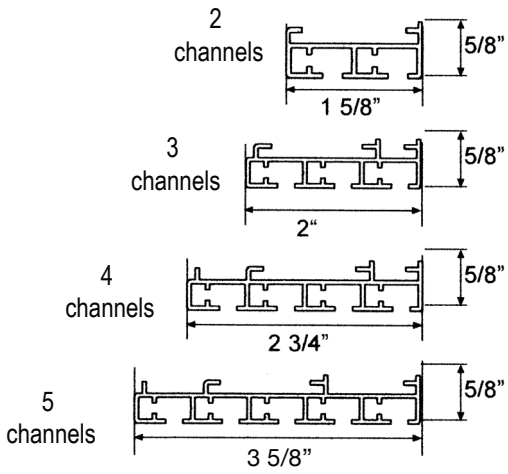
How To Order

Wand Control

- Wood wand size: 36".
- Some configurations require dual wands. Lead panel on each side will come with a wand.

Panel Stack Configurations

- Specify panel configuration from choices below.
- Approximately 3" material overlap when panels in fully closed position.
- Each stacking side will have 1 fixed panel.
- Split stack configurations available.



Number of Panels	(Overall Width)	Stack Position / Configurations ("Room View" - Each stacked side will have 1 fixed panel)		
		Single Stack Left Stack	**Single Stack** Right Stack	**Split Stack** **Note:** Comes with Dual Wand
2 Panels (1 overlap)	21" - 89"	**2L** – two panels stack left (2 channel track)	**2R** – two panels stack right (2 channel track)	NA
3 Panels (2 overlaps)	30" - 132"	**3L** – three panels stack left (3 channel track) 	**3R** – three panels stack right (3 channel track) 	NA
4 Panels (2 or 3 overlaps depending on number of stacks)	39" - 175"	**4L** – four panels stack left (4 channel track) 	**4R** – four panels stack right (4 channel track) 	**2L2R** – two panels stack left, two panels stack right (2 channel track) 5 Panels (4 overlaps)	48" - 216"	**5L** – five panels stack left (5 channel track) 	**5R** –five panels stack right (5 channel track) 	NA

* Note: All fabrics are included under these configurations except 3% Sheerweave 5000

PRODUCT SPECIFICATIONS

Number of Panels	(Overall Width)	Stack Position / Configurations Option for Split Stack (odd number panels) and Center Closure front panel as leading panel ("Room View" - Each stacked side will have 1 fixed panel in the rear)	
		Split Stack (odd number Panels)	
2 Panels (1 overlap)	21" - 89"	NA	NA
3 Panels (2 overlaps)	30" - 132"	**1L2R** * – One panel stack right, Two panels stack left , (2 channel track)	**2L1R** *– Two panel stack right, one panel stack left (2 channel track)
4 Panels (3 overlaps)	39" - 175"	**1L3R** * – One panel stack left, Three panels stack right (3 channel track) 	**3L1R** * – Three panels stack left, one panel stack right (3 channel track) 5 Panels (4 overlaps - comes with dual wands)	48" - 216"	**2L3R** * – Two panels stack left, three panels stack right (3 channel track) 	**3L2R** * –Three panels stack left, two panels stack right (3 channel track) 
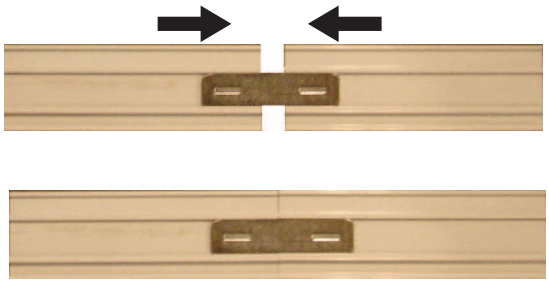
* Note: All fabrics are included under these configurations except 3% Sheerweave 5000

Panel Track Profile
- White painted aluminum profile.
- See mounting depth requirements on page 21 for panel track sizes.

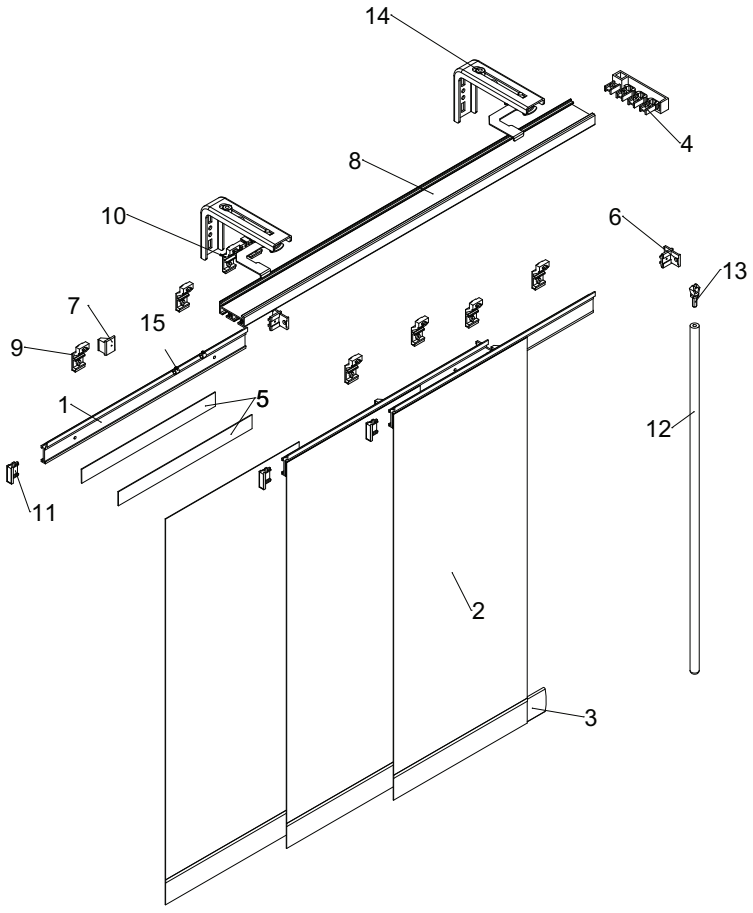


Panel Track Splice
- Automatically comes with any window opening over 144" wide – track ships from factory in (2) equal size pieces.
- Recommended (request when placing order) with window openings over 100" wide to reduce risk of freight damage and provide easier handling by installers.
- Splice plate easily & securely connects separate tracks together to operate as a single track unit.
- Installers prefer the convenience of handling smaller tracks on the job site, then connecting together at installation.

Panel Size / Stacking Width
- **12" Minimum Panel Width** *(includes 3" for overlap).*
- **12" Minimum Panel Height**.
- **46" Maximum Panel Width** *(includes 3" for overlap).*
- **144" Maximum Panel Height**.
- individual panel size varies depending on overall shade width & panel configuration.

NOTE: The smaller the panel width, the narrower the stacking space
To calculate stacking width; overall width + (number of overlaps x 3) then divide by number of panels

Example # 1 – 3 panel 112" W + 6 (2 overlaps x 3 = 6) = 118 divide by 3 panels = 39-3/8" stacking / panel width
Example # 2 – 4 panel 112" W + 9 (3 overlaps x 3 = 9) = 121 divide by 4 panels = 30-1/4" stacking / panel width



1. Moving Rail
2. Fabric
3. Bottomrail

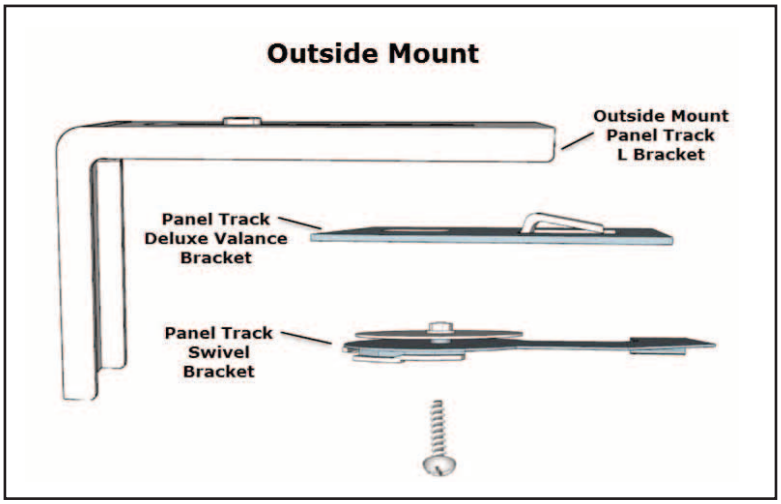
Headrail Width	- 1/4"	net
Overall Fabric Width	- 1 3/8"	- 7/8"
Overall Height	- 1/2"	net

Fabric Cornice Bracket Kits

OM 6" return depth (2 brackets): Part #KIT6173
OM 6" return depth (3 brackets): Part #KIT6176
Custom return depth (6.5, 7, 7.5, 8): Part #KIT6205
Inside Mount - No Returns (2 brackets): Part #KIT6177
Inside Mount - No Returns (3 brackets): Part #KIT6181



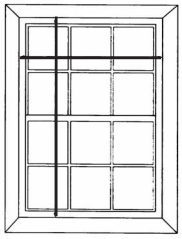
PANEL TRACK HOW TO MEASURE

Note: Projection of window handles / cranks could interfere with panel track panels. Refer to "mounting depth requirements" above for projection clearance

Inside Mount (IB) Installation - Window

To find width: Measure the opening across the top where the headrail is to be installed from inside of jamb on left to inside of jamb on right. **Round the measurement down to the nearest 1/8". Refer to mounting depth requirements**.

To find height: Measure from the inside top of the opening on the left, at the center, and on the right to the sill; **round the measurement down to the nearest 1/8" and note the smallest dimension. Do not make any allowances: the factory will make all adjustments so the headrail will fit the opening properly and the panels will clear the sill by 1/2"**.

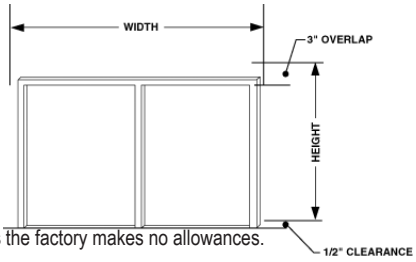


Inside Mount

Outside Mount (OB) Installation - Patio Door / Room Divider

To find width: Measure the width of the area to be covered at the place where the headrail will be installed to the nearest 1/8". Blind should overlap opening at least 4" on each side.

To find height: Measure the height of the area to be covered and **round down to the nearest 1/8"**. Blind should extend **at least 3" above opening or window moulding**. For ceiling-to-floor installations, deduct 1/2" for proper clearance.

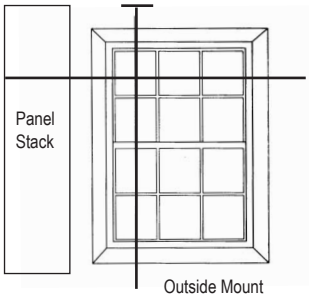


Specifying OM measurement means the factory makes no allowances.

Outside Mount (OB) Installation – Window

To find width: Measure the width of the area to be covered at the place where the headrail will be installed to the nearest 1/8". Blind should overlap **opening at least 4"** on each side to ensure privacy. To calculate stack dimensions, refer to page 7.

To find height: Measure the height of the area to be covered and **round down to the nearest 1/8"**. Blind should extend **at least 3" above and 3" below opening or window moulding.**



Outside Mount

Special Measuring & Installation Considerations

Caution: Panel Tracks installed on windows near wall or baseboard heaters must clear the heaters by 12" above and 6" to the side.

Stretching of panel materials is probable with Textured materials:

IB Mount - we do not recommend IB mount due to probable stretching

OB Mount - extra adjustment recommended for placement of mounting brackets allowing panel clearance above the floor to anticipate panel material stretching:
• material can stretch up to 1" length
